⚙ SautiYetu – Feature Breakdown (MVP)

This breakdown explains what each feature does, **why it matters**, and **how it helps** the users — especially women in rural Kenya who may be vulnerable or fear speaking out.

---

1. Anonymous Abuse Reporting Form

What it does:
Allows any user to **report abuse without logging in**, giving full anonymity and control over what they share.

Key Points:

- Victim enters what happened (text), selects abuse type (physical, sexual, emotional, etc.).
- Optional: location (not GPS), age range, relationship to abuser.
- **No personal data is required** unless the victim chooses to give it.
- Encourages victims to take the first step — *without fear or pressure*.

---

2. Voice Message Reporting (Audio Share)

What it does:
Allows users to **record their abuse story using voice** instead of writing — ideal for elderly or illiterate women.

Key Points:

- Simple record button (🎤) with Swahili audio prompts like *"Sema hadithi yako hapa."*
- Limited to 2 minutes (to save server space).
- Voice is **encrypted** and stored securely.
- Offers a **dignified option** for women who cannot type or read.

---

3. Bilingual Interface (Swahili + English)

What it does:
Ensures every woman in Kenya can understand the platform clearly.

Key Points:

- Users toggle between English and Swahili.

- All buttons, instructions, and messages are translated.
- Future versions may support more local languages.
- Reduces fear of misunderstanding the system.

---

4. Self-Help & Guidance Page

What it does:
Provides **practical steps and emotional support** for victims, especially if they're not ready to report or talk to someone.

Key Points:

- Simple guides: "What to do after rape," "How to leave a violent home," "Your legal rights."
- Emergency numbers of nearby NGOs, shelters, clinics.
- **Icons and images** used to explain ideas to those who struggle with reading.
- Downloadable flyers for offline sharing.

---

5. Private Admin Dashboard (For Trusted Helpers)

What it does:
Allows **certified NGOs or counselors** to view reports and take action **only when the victim permits.**

Key Points:

- View only anonymous reports unless the user chooses to be contacted.
- Search, filter, and flag serious reports (e.g., suicidal notes or life-threatening abuse).
- **No access unless admin is trained and verified.**

---

6. Abuse Data Insights (Anonymous Analytics)

What it does:
Tracks **abuse patterns in communities** without exposing anyone.

Key Points:

- Shows the most common types of abuse, top reporting regions, age groups.
- Helps NGOs or churches **target outreach**.
- Data never includes names or personal details.

- Can be exported for donor reports or policy support.

---

7. Safety & Privacy Tools

What it does:
Protects the user at every step.

Key Points:

- No cookies, no IP tracking.
- No login or password required.
- A **"Quick Exit" button** redirects to Google if someone is watching.
- All info is **encrypted and stored securely**.

---

8. Offline Access & Community Partner Support

What it does:
Allows women without smartphones or internet to still access the system through **trained helpers**.

Key Points:

- Community health volunteers, youth leaders, or pastors can help victims enter reports using a tablet or phone.
- Posters in churches, markets, and clinics give awareness of where help exists.
- Offers digital help **through physical trust**.

---

9. Feedback & Follow-Up Option (Optional Contact)

What it does:
Gives the victim full control over whether they want someone to contact them after reporting.

Key Points:

- After submitting, they see: *"Would you like someone to reach out to you?"*
- If yes, they can leave a phone number or email.
- **Only trusted admins** will access this data — and only for that one report.
- Builds **trust-based bridges** to real help.

☑ Summary Table (Quick Glance)

Feature	Why It Matters
Anonymous Form	Speak safely without fear
Voice Recording	Ideal for elderly or illiterate women
Swahili/English UI	Accessibility for all
Help Page	Empowerment without pressure
Admin Panel	Secure, permission-based help
Analytics	Community-level awareness
Privacy Tools	Total safety and control
Offline Access	Reaches rural women
Follow-Up Option	Victim chooses next step
